AdminRx from Rx Savings Solutions

Powerful Prescription Data Where it's Needed Most

Rx Savings Solutions is a patented web-based software platform that is proven to eliminate complexity from the pharmacy landscape and reduce pharmacy spend. Health plans, employers and covered members lower their pharmacy costs by an average of $517 per registered member.

The traditional Rx Savings Solutions model puts personalized savings information directly in the hands of the members via an online dashboard or mobile app. AdminRx takes it one step further.

AdminRx opens up the power of the Rx Savings Solutions platform to clients and their providers in order to create awareness, communicate savings suggestions and drive member behavior change at additional touchpoints throughout the member journey.

Primary AdminRx Use Cases

Customer Service Teams:
AdminRx is a valuable front-line tool for representatives while helping members navigate their pharmacy benefits.

**Medication Therapy Management (MTM) Teams:**
In-house pharmacists can leverage customized information to help in optimizing drug therapy and improve therapeutic outcomes for patients.

Employer Health & Wellness Clinics:
For Rx Savings Solutions clients with onsite or dedicated clinics for employees, AdminRx gives practitioners the ability to find and evaluate the lowest-cost therapies before prescribing.

Provider Networks:
Physicians and other prescribers in network practices can see all available options and plan prices for the member to help drive down costs at the point of prescription.

Help Your Team Take the Initiative

Proactivity is one of the founding principles of Rx Savings Solutions. Because the best path to behavior change begins with informing medication decisions before a member arrives at the pharmacy. With AdminRx, it's no longer up to members alone. Enable better support at every touchpoint, and their first decision will be the best decision.

	Feature	Function	Benefit
	Member Lookup & Detail	Search for members, manage member communication preferences, view member plan details and claims and see prescription change requests and adherence.	Manage and access the member experience all in one place, and with complete visibility.
	Prescription Requests	Manage and assist members with prescription change requests, and track progress with providers and pharmacies.	Remove barriers to behavior change and expedite savings that involve changed prescriptions.
	Alerts Dashboard	Review aggregate reports of historic savings alerts and notifications for an entire group's membership.	Analyze and understand the full value of savings opportunities to the member and/or plan.
	Price Lookup	Search for medications on discount networks and at geo-located pharmacies	Direct member prescriptions to the lowest-cost vendor for maximum savings.
	Manage Administrators and Roles	Control access, authorized users and permissions for various roles with a client group.	Ensure proper access, security and HIPAA compliance.
	Log in as Member	See exactly what an individual member sees on his/her portal interface.	Provide better assistance, click by click, throughout the user experience.
