

AdminRx for Care Coordination

Now multiple teams can measure, monitor and elevate the member experience with one powerful solution.

Your health plan makes sizeable investments to improve health outcomes. Why not invest in one tool that helps every responsible team do more for your members?

That's AdminRx for Care Coordination.

Powered by Rx Savings Solutions' patented platform, it aligns your teams around a one-stop solution, enabling better collaboration, consultation and cost savings on all medication-related care.

Pharmacy Teams

- Inform and improve clinical action plans
- Track cost and adherence trends
- Monitor custom MTM-related metrics

Care Coordinators

- View a member's complete medication profile
- Help members find affordable covered alternatives
- Measure portion of days covered

Case Managers

- Access claims-verified medication history
- Identify adherence gaps
- Click an easy button for provider approvals

More Touchpoints, More Value

Employer Health and Wellness Clinics

Give practitioners the ability to find and evaluate a member's lowest-cost therapies before prescribing.

Provider Networks

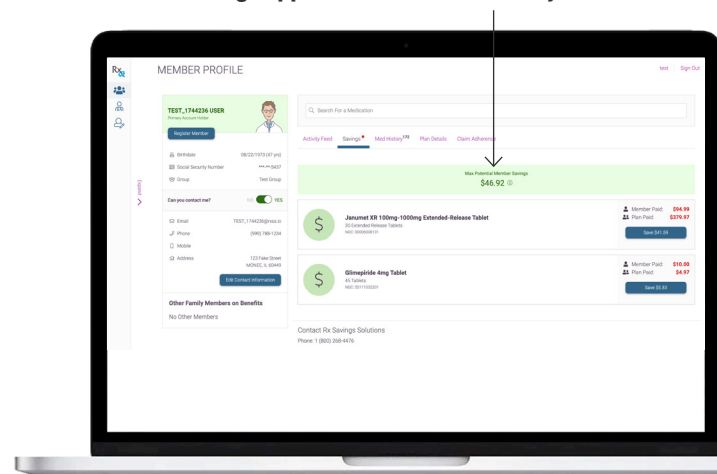

In-network practices can see all options and plan prices to help drive down costs at the point of prescription.

Navigation/Advocacy Solution Providers

Customer service representatives gain a valuable front-line tool for helping members navigate the pharmacy benefit.

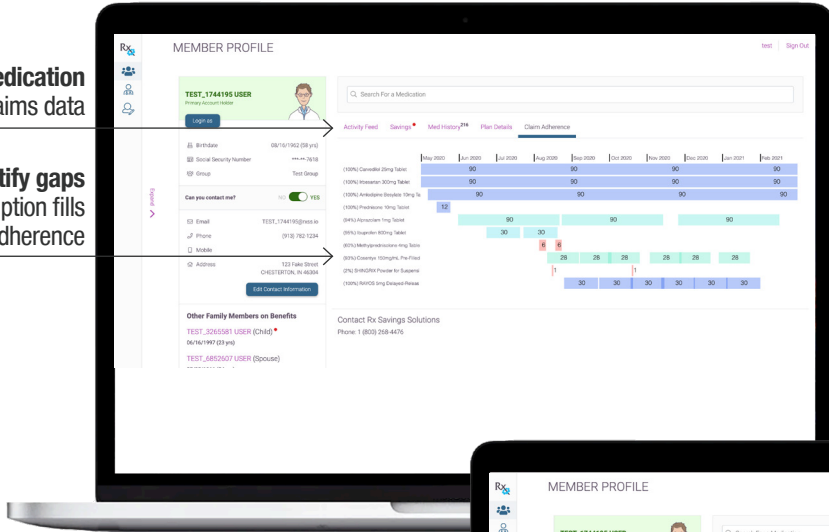

Find savings opportunities for on-formulary alternatives

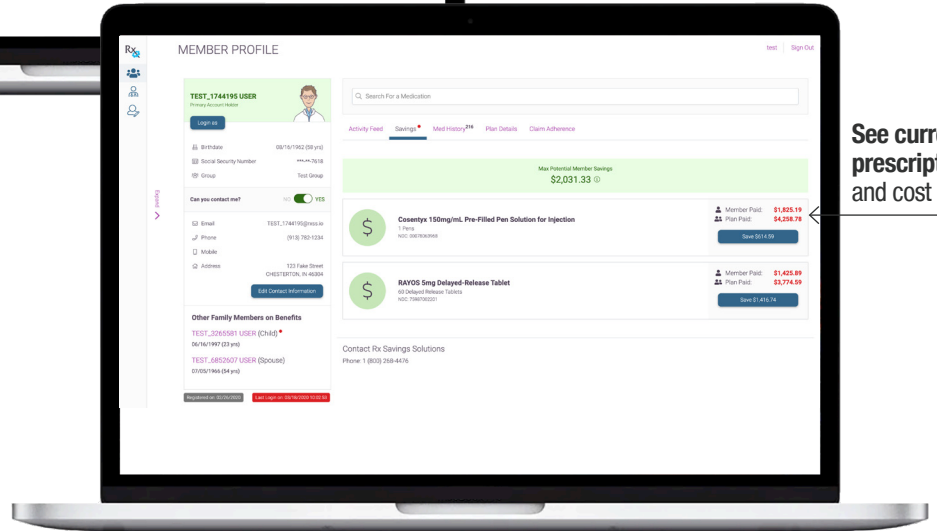

Informing Better Experiences and Outcomes

Review medication history via claims data

Identify gaps in prescription fills and adherence

See current prescriptions and cost share

Enrich Interaction, Influence Ratings

Think of all the clinical factors measured in HEDIS data, along with those for member satisfaction in CAHPS surveys. AdminRx for Care Coordination touches all of them. That means you can influence Medicare STAR Ratings throughout the member experience.

- Lower out-of-pocket prescription costs
- Informed member outreach
- Streamlined services
- Better adherence
- Improved care plans
- Barriers removed
