

RX HOME DELIVERY

Now it's even easier to
get prescriptions delivered.

We can get almost anything delivered these days—groceries, furniture, and even cars. Why shouldn't we enjoy the same convenience when filling our prescriptions? With the new **Rx Home Delivery** service, it's easier for members to have their medications delivered straight to their door.

The Rx Savings Solutions online portal has always been a trusted source for finding lower-cost prescription options. Now members can log in to the same platform and easily switch their current medications to an in-network home delivery service with just a few clicks. Free shipping. No new trips to the doctor. No 90-day fill requirements (unless specified by the plan sponsor).

It's all about making our members' lives easier—whether it's saving them money or providing home delivery of the medications they need.

This new service is delivering on that same principle, with some added benefits:

Convenience

Long lines, crowds and other hassles of picking up prescriptions from the pharmacy are now a thing of the past.

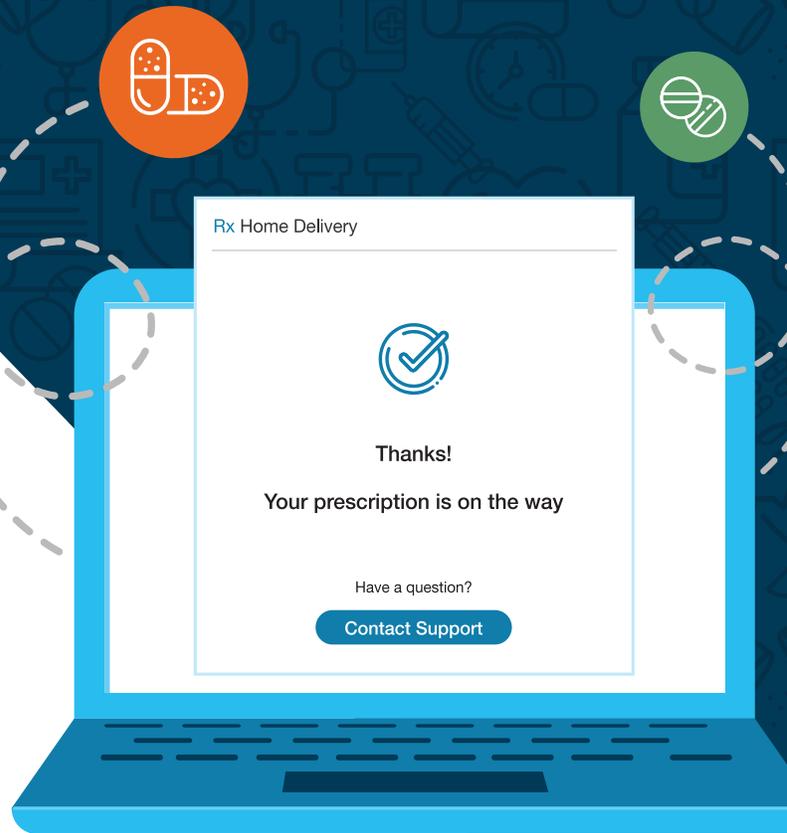

Safety

No matter the public health concern—flu season or something more serious—there's no need for members to risk exposure at a retail store when we offer fast, confidential and free delivery.

Adherence

We know our members are more likely to stay adherent with their medications when they can easily and automatically have their prescriptions filled and refilled.

Top 3 FAQs

1

What medications are available through Rx Home Delivery?

About 90 percent of prescriptions can be filled using this new service—no controlled substances or specialty drugs.

2

What about refills?

Members have the option to choose automatic refills when setting up their Rx Home Delivery preferences.

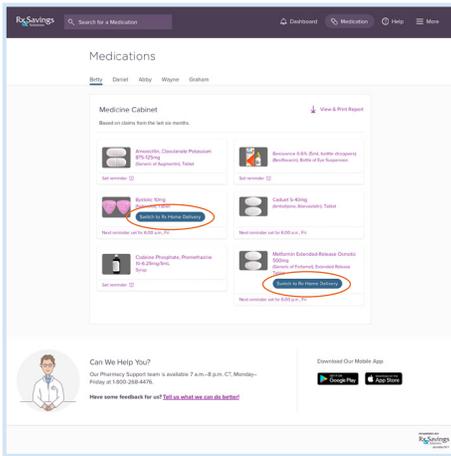

3

Can members use Rx Home Delivery even if they don't have a savings opportunity?

Yes! Members are able to select home delivery for any eligible prescription, regardless of a savings opportunity.

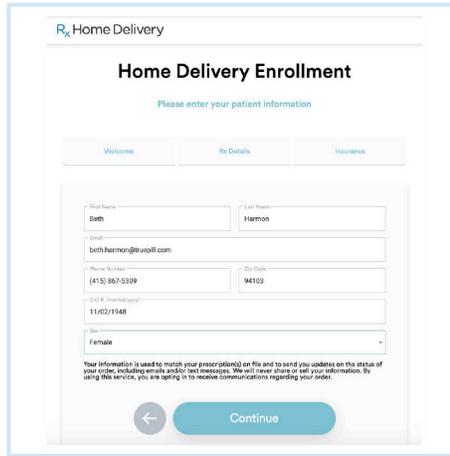

How it Works

1

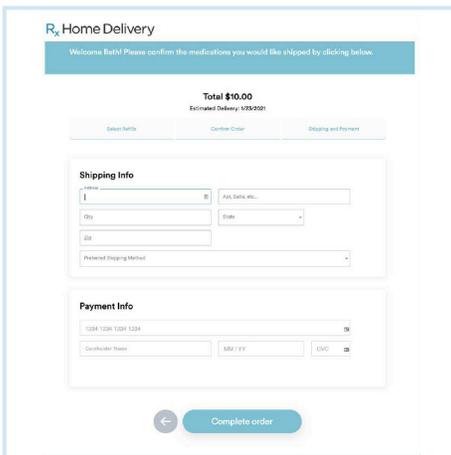

From the “Medications” section of the online portal, **click on the “Switch to Rx Home Delivery” button** displayed next to eligible prescriptions.

2

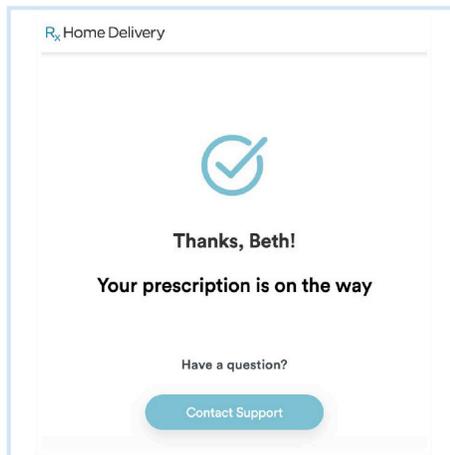

Once selected, members are prompted to **provide some basic information to enroll in Rx Home Delivery**. We'll work with a member's doctor to change the fulfillment method.

3

Members are contacted via text or email once the switch to home delivery is complete—they'll be asked to confirm shipping and payment details online.

4

That's it! Prescriptions are shipped to the member's door.

NEW DELIVERY SERVICE. SAME TRUSTED MEMBER SUPPORT.

Our Pharmacy Support team is ready to help walk members through the Rx Home Delivery service and provide the same level of concierge support we've become known for.
